Subject: Annual Sports Fishing License 2014

Hello,

Today I went to Walmart and bought my fishing license. I always seem to get it late in the season and I was curious as to why the license is only good from Jan to Dec of current year, rather than 365 days from date of purchase.

I was curious so I called the Sac office and they said its always been that way. It seems to me in our modern day technology, a person getting the permit should have full use of the permit (365 days) from the date of purchase rather than by the calendar year.

I am aware many other states offer this license 365 days from date of purchase.

I am sure there is some reasoning to this and I am curious as to why?

Thanks,

-Mr. Robert
