Subject: Urbanized coyotes in Orange County
Date: Wednesday, October 08, 2014 12:42:04 PM

CA F&W Commission,

This email is in dissent of the presentation by Project Coyote and possibly similar groups at the October 7, 2014 meeting held in Mt. Shasta. These groups consist of individuals, non-residents, who have exhibited radical behaviors at local community events and who have perpetuated myths about methods implemented to control the overpopulation of urbanized coyotes in effected urban areas. Humans are at risk due to the high numbers of urbanized coyotes in their areas. I would hope that the CA Dept of F&W chooses to react in a manner to keep coyote populations to a sustainable level and to limit human/coyote interactions.
