Subject: Requesting to add Goose Barnacle on recreational take for consumption.
Date: Friday, November 07, 2014 1:28:14 PM

Dear Fish and Game Commissioner.

Barnacles are delicacy in many different countries. As we live in California with diversified race, it is not surprising to find goose barnacle can be on the menu. I have sent email to DFG before and found that it is illegal to take Goose Barnacle. But another person recently asking same question that I asked years ago. As it seems that it is possible to request to DFG commissioner to include Goose Barnacle for recreational take.

I do not know how to request this animal to be included in California regulation. If you can tell me step by step process to properly request this animal to be included, I will follow up with procedure.

Please let me know and thanks for reading this email.

Jerry.
