Ok guys 700 bears short of the season quota after making the use of dogs illegal. I'm not a biologist but even I can figure out that this is going to lead to a over population of bears which is going to negatively effect the already poor deer herd in this state.

It's time to stop letting the stupid politicians in this state make decisions on wildlife populations for their own personal gains rather than the actual true health of the wildlife population in this once great state.

WAKE UP! and stop letting politicians in this state ruin our wildlife population.

Remember no hunting means no money from hunters which means you loose your job!!
