**Subject:** Stop Urban Coyote Attacks in our Communities  
**Date:** Monday, September 15, 2014 1:35:57 PM

---

California's communities have suffered from increasing urban coyote attacks. Many residents have turned to their city councils and have not seen any concrete measures taken, while also experiencing an increase in the amount of coyote attacks in their neighborhoods. The safety of our children, families, and pets is not something that can be ignored any longer.

California needs to adopt a state solution to these urban coyote attacks on communities that does not rely upon the disproven approach of hazing
