Attn: Mr. Bonham: With respect for your office, this California citizen was appalled when she read of the dangerous situation, incidentally of LONG standing, of the continued importation of large BULLFROGS meant for the notoriously cruel LIVE meat markets related in an article by Mr. Chris Clark. While no expert in this area of Fish and Wildlife, I am nonetheless deeply and profoundly disturbed by not only the Meat market aspect but also the sincere concern that these creatures are damaging our Native frogs by bringing in disease hitherto not experienced by our native frogs which are already undergoing severe stress. Does our government have SO LITTLE concern with the monies derived from this trade that we continue to ruin our natural environment with such impunity??? DISGRACEFUL!!!! Please DO the job the taxpayers pay you to do and END this loathsome and lethal trade! SAVE OUR FROGS!! Thank you, Elaine Livesey-Fassel
